DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5-05-03 has been entered.

Claim Objections

Claim 12 objected as a duplicate claim under 37 CFR 1.75 as being a substantial duplicate of claim 11 is withdrawn.

Claim Rejections - 35 USC § 103

2. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glenn, Jr. et al (6,277,797).

Applicant argues that Glenn, Jr. et al neither teaches nor suggests using his oxyethylenated or oxyethylenated/oxypropylenated compounds to thicken his liquid compositions.

The examiner contends and respectfully disagrees with applicant. The claimed invention is broadly claiming a composition, wherein said composition comprises three components a) surfactant; b) silica; c) an oxyalkylenated compound; and d) water. The newly amended claims describe the oxyalkylenated compounds as being a thickening agent. Given the broadest reasonable interpretation of the claim, any composition

Art Unit: 1751

comprising a-c meets the claim limitations. Therefore, Glenn, Jr. et al teach a liquid composition, however, the claims of present invention do not preclude liquid composition and therefore meet the claimed limitation.

With respect to the oxyalkylenated compound being a thickening agent. The examiner contends that applicant is allowed to be his own lexicographer. However, the component claimed by applicant is well known in the art and is cited in the four corners of the Glenn, Jr. et al reference. Therefore, the properties of the claimed would have been obvious, absent a showing to the contrary, because they would encompass similar functions and properties since they are the same component, but used for a different purpose. The reason or motivation to modify the reference may often suggest what the inventor has done, but for a different purpose or to solve a different problem. It is not necessary that the prior art suggest the combination to achieve the same advantage or result discovered by applicant. In re Linter, 458 F.2d 1013, 173 USPQ 560 (CCPA 1972) In re Dillon, 919 F.2d 688, 16 USPQ2d 1897 (Fed. Cir. 1990), cert. denied, 500 U.S. 904 (1991). The rationale to modify or combine the prior art does not have to be expressly stated in the prior art; the rationale may be expressly or impliedly contained in the prior art or it may be reasoned from knowledge generally available to one of ordinary skill in the art, established scientific principles, or legal precedent established by prior case law. In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988); In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). See also In re Kotzab, 217 F.3d 1365, 1370, 55 USPQ2d 1313, 1317 (Fed. Cir. 2000).
